

You are holding what we hope is the first of many newsletters devoted to analytical thinking and philosophy for children.

The newsletter is published by the School of Education and the Program for the Advancement of Analytical Thinking for Children of Texas Wesleyan College. The newsletter will be published two times a year - December and May.

Our purpose is to provide a forum for people who are involved in doing philosophy and logic with elementary and secondary school children.

We invite correspondence, articles, etc., dealing with those subjects. Reports from teachers and school administrators are encouraged.

---

The program and the newsletter are supported by a generous grant from the Fleming Foundation.
